ALLIES CRUSH GERMAN LINES

TEUTONS ON RUN, TERRIFIC AT-
TACK MADE ON WIDE
FRONT.

AFTER U-BOAT BASES

Second Line Trenches Captured on
Twenty-Mile Line, Losses
Are Heavy.

One of the big moves of the war apparently is under way in Flanders where the right flank of the German front is anchored upon the sand dunes and flat fields that skirt the North sea coast. Unprecedentedly terrific battle of big guns that has been raging for days past has been succeeded by a charge of the infantry and a combined British and French force is sweeping forward over the strongly fortified Teutonic lines, as the following dispatch shows:

British Front in France.
July 31.—(By the Associated Press.)—The entente allied forces which launched their offensive this morning have advanced well beyond the shell-shattered front line German trenches. In many places they have reached the second line defenses on a twenty-mile front of attack, according to the early reports.

The British and French troops went into battle under cover of what perhaps was the greatest barrage fire ever seen during the war.

The entente artillery is moving forward and the whole situation is satisfactory in every particular.

Between Dixmude and Boesinge the attackers reported they had secured the two first lines of trenches after having fought over the most difficult terrain imaginable.

The British again have captured La Basseville, which they recently relinquished to the Germans.

The British and French forces are facing a large concentration of German artillery and fresh troops, which have been rushed up.

The entente allies have established complete air superiority.

The entente military officials say the morale of the Germans here is not up to the old standard.

After U-Boat Base.

It seems significant that French forces have combined with British for an assault on this front, where an attempt to break through or turn the German flank has been expected for some time. A keen command to get at the German submarine bases which line the shores of Belgium has also been in evidence, and this purpose would be accomplished by any sweeping victory achieved on the Flanders front.

On Wide Front.

The attack on the two allied armies is marked on the southern boundary of its field by the river Lys, about thirty miles from the coast. "A wide front" is the official British expression describing its scope, which obviously does not make it clear how far toward the coast the thrust extends.

The operation gives every evidence of being a major one, however, and it is clear that it was successful in its initial stages, the London War Office account declaring:

"In conjunction with the French troops operating on our left we attacked at 3:50 o'clock this morning on a wide front north of the river Lys.

"The allied troops have captured their first objectives on the whole front attacked and are reported to be making satisfactory progress at all points.

"Considerable numbers of prisoners already have been captured."

The battle front north of the river Lys stretches from Warenton, on the Franco-Belgian border, to the North Sea coast, the distance between those two points being about thirty miles. Included in this battle area is the famous Wytschaete-Messines front, where the British on June 7, after exploding 1,000,000 pounds of high explosives under the German lines, attacked on a nine-mile front and captured the high ridge, several small towns, forty-seven guns and more than 7,000 prisoners.

Germans Surprised.
The launching of the drive was seemingly a surprise to the Germans,

who only yesterday were boasting that the intensity of their reply to the British bombardment had caused the British gunners to lessen the violence of their fire.

It comes, however, after the failure of the tremendous efforts the German Crown Prince has been putting forth to break the French front in the Aisne region. The French reserve force evidently is great enough not only to withstand such powerful hammering successfully, but to allow of co-operation with the British with a stroke at another portion of the line.

Petain's Attack.
In addition General Petain last night made a successful attack on his own account on the Aisne front, carrying Germans positions 1,500 yards wide on the Chemin-des-Dames at La Royere and west of Epine de Chevreigny, breaking a German counter-attack and capturing more than 160 prisoners, according to the official Paris War Office.

French Statement.
The French statement reads:
"An attack delivered by us at 8 o'clock last night on a front of 1,500 yards south of La Royere and west of Epine de Chevreigny resulted in complete success. We reached all our objectives and we broke a German counter attack in the course of which we took 167 prisoners, including two officers and about fifteen non-commissioned officers belonging to three regiments of infantry.

"Artillery fighting followed by infantry engagements are being maintained with much spirit in the Cerny-Hurtelise sector.

"In Champagne northwest of Prosenes, the enemy after a violent bombardment attempted a surprise attack which was turned to failure by the vigorous reply of our artillery and infantry fire.

"There have been active artillery exchanges on both banks of the Meuse."

Business Failures.
For the week ending July 19, 1917, and for corresponding weeks in previous years, business failures in the United States are reported by Bradstreet's as follows: Week ending July 19, 1917, 241; July 12, 1917, 268; July 12, 1916, 284. Weeks corresponding to this week 1915, 327; 1914, 262; 1913, 254.

BOARD MEMBERS CAN NOT RESIGN

MEMBERS OF LOCAL EXEMPTION
BOARDS MUST SERVE
COUNTRY.

Frankfort, Ky., July 31.—Members of exemption boards will not be allowed to resign in the future except for the most urgent reasons and with the approval of the Governor. Provost Marshal General Crowder notified Governor Stanley this morning, and unless they serve their cases will be presented to the Department of Justice. The Governor was also advised to appoint a member of each board to administer oaths.

Crowder's Telegram.
General Crowder's telegram follows:

"Ample time and opportunity now has been allowed to persons designated as members of local board to present any reasons they may have for not serving as such. It is indispensable that the personnel of these boards be completed by section six of the selective draft law. Persons designated to perform this service are as effectively drafted for this duty as are the registrants who are to be selected for the military service. In the future members of local boards will be excused from performing this service only for the most urgent reasons, approved by the Governor of their State. It is requested that the Governor closely scrutinize each case presented to him and that he recommend excusing of members of local boards only in case of great hardship. Unless the Governor believes that the excuse that is presented is valid, substantial and controlling, the attention should be directed to section six of the law, and in case of further refusal to serve the case should be reported to the nearest representative of the Federal Department of Justice.

"These instructions do not apply, of course, to members of boards who are to be removed under instructions of the War Department."

"GOD BLESS MR. HOOVER."

—Weed in Philadelphia Public Ledger.

I. W. W. LEADER HANGED BY MOB

SAID TO HAVE REFERRED TO U.
S. SOLDIERS AS SCABS IN
UNIFORM.

Butte, Mont., Aug. 1.—Frank Little, member of the executive board of the Industrial Workers of the World and a leader in labor troubles in Arizona, was taken from a lodging house early today by masked men and hanged to a railroad trestle on the outskirts of the city.

The body was cut down at 8 a. m. by the Chief of Police, Jerry Murphy, who identified it. Little, in a recent speech here, referred to United States troops as "Uncle Sam's scabs in uniform."

Since his arrival in Butte recently from Globe, Ariz., Little had made a number of speeches to strikers in all of which he had attacked the government and urged the men to shut down the mines of the Butte district. He was bitter in his denunciation of the government. His record was under investigation by the Federal authorities whose attentions had been called to his activities. On the other hand, the report was current that Little was in the employ of a detective agency and one theory was that he was the victim of the radical element of whom he appeared to be a member.

Haywood's Lieutenant.
Little took a leading part in recent labor troubles in Arizona. He addressed a letter to Gov. Campbell, of Arizona, protesting against the deportation of I. W. W. members from Bisbee. This letter was written from Salt Lake. Gov. Campbell replied, telling Little he resented his interference and his threats. Little was understood to have the confidence of William D. Haywood, Secretary of the I. W. W. National Organization, and was regarded here as one of Haywood's confidential agents.

Little was a cripple, but active, and a forceful speaker. On Little's body was a card bearing the words: "First and last warning. Others take notice. Vigilantes."

Little was taken out of the building in which he lodged by a party of masked men who took him away in an automobile. He was not given time to dress. The building is near the Finn Hall, which is headquarters for the new Metal Mine Workers' Union, which recently called a strike of miners and which was frequently addressed by Little.

He Can Be Worse.
"What am I ever going to do with such a bad boy?" sighed the harassed mother.
"You better leave me alone," answered the boy, referred to "I ain't half so bad as I know how to be!"

GEN. H. G. OTIS DIES SUDDENLY

PROMINENT SOLDIER AND VET-
ERAN EDITOR PASSES
AWAY.

Los Angeles, Cal., August 1.—Gen. Harrison Gray Otis, president and general manager of the Los Angeles Times, died yesterday at the home of his son-in-law, Harry Chandler.

The death of General Otis occurred while he was at the breakfast table. Heart failure was said to have been the cause. Although he had suffered occasional attacks of illness recently, General Otis, who was more than eighty years old, had been at his desk in the Times office nearly every day within the last few weeks.

Over five years of General Otis' life was spent as a volunteer soldier of the United States. He saw forty-nine months of actual service in the Civil War, was twice wounded and received seven promotions, including two brevets, retiring with the title of major and lieutenant-colonel, by brevet.

With the outbreak of the Spanish-American war, in 1898, Major Otis, at the age of sixty-one, volunteered his services to President McKinley and was made a brigadier general of volunteers. He was assigned to duty, first at Camp Merritt (Cal.) and then to the Philippines, where at different times, he commanded various divisions of the Eight Army Corps in the campaign for pacification of the native revolt. He resigned his command in April, 1899, returning to the United States. Upon discharge he was brevetted major general for "meritorious conduct in action."

Following the Civil War, Otis returned to the trade of printer, for which he had abandoned school at an early age, acquiring, finally in 1882 a fourth interest in the Los Angeles Times. Previously he had served for four years as foreman of the government printing office at Washington.

Quite early in his career as editor and publisher of the Times, for he speedily secured full control. Otis came into conflict with organized labor, and thereafter until the day of his death he waged an unrelenting warfare for what he termed industrial freedom. On October 10, 1910, his building and printing plant was dynamited and twenty of his workmen killed. The arrests and trials which followed were matters of nationwide interest.

Gen. Otis acquired a large fortune, his interests aside from publishing being extensive. In politics his paper ever reflected the attitude of its editor—aggressive, uncompromising Republican. Otis' connection with that party dating back to 1860, when he was sent from Kentucky as a delegate to the convention

at Chicago which nominated Lincoln for the Presidency.

NO EXCUSE FOR HIGH COAL PRICES, REPORT

Chicago, July 31.—Drastic action by the State to curb high prices of coal was recommended today to the Illinois State Council of Defense by the Council Committee which last week met with representatives of the coal mine operators of Illinois.

The report said: "There is no excuse for the present high prices of coal in Illinois."

Whether the action would be a request for a special session of the Legislature to give greater powers to the council or an order fixing a maximum price was not announced.

The report called attention to the fact that coal, which was selling last year for \$1.35 a ton, now is being quoted at \$3 to \$3.50 a ton. Wages have gone up only twenty cents a ton. "This increase," the report declares "can not account for a jump of \$2.15 a ton in the price of coal at the mines between July, 1916 and July, 1917. Federal action has been and may be so long delayed, as to be totally ineffective. If no other way remains the control of prices in Illinois alone will be urged and enforced if necessary."

GIRLS TORTURED AND SLAUGHTERED BY GERMANS

London, July 31.—A dispatch received today by the Wireless Press from Amsterdam says:

"The German authorities at Liege, Belgium, arrested, tried and sentenced to death within three days an influential Liege merchant named Groneret, his wife and their two daughters, 20 and 14 years old, on an unproved charge of espionage.

"The father and mother were both shot to death in the presence of their daughters. The latter were offered their freedom if they revealed the names of their parents' accomplices. The girls refused, the eldest saying: 'If we speak we might cause fifty people to be killed. We would rather die alone.'

"She was immediately shot. The youngest girl then was tortured, outraged and also shot."

U. S. SHIPS PUT U-CRAFT TO ROUT

SUBMARINES, ENGAGED BY
AMERICAN DESTROYERS,
SHOW HEELS.

American Naval Base in British Waters, July 31.—American destroyers today reported having engaged two submarines simultaneously six miles distant, causing both of them to speed away and submerge without firing a shot—typical of the behavior of submarines when they see destroyers.

One of the submarines had just sunk a steamer by gunfire; the second was attacking a merchantman when the destroyers opened fire. The second submarine, which is described as a super-type, almost as long as a destroyer, raced off and submerged at the first shots, but the other, which had sunk the steamer, displayed unusual boldness, remaining up several minutes while the destroyer dropped shells around her.

Only when a shell splashed within twentyfive yards of the submarine did she submerge, according to the crew of the steamer who watched the attack from a small boat close by and who later were rescued by the destroyers brought here.

A French tanker bound for America limped into port today with a thirty-foot hole in her bow as a result of a fight with a submarine. The tanker was twice attacked. In the first, early in the voyage, she easily beat off the submarine and reached a point 400 miles toward America. She was then attacked by another submarine, the shells of which, despite the stout resistance of the tanker's gunners, shattered the pilot house, smashing the compass, and tore a gaping hole below the waterline.

The tanker began to settle, and the crew abandoned the ship, the submarine disappearing. The crew rowed away in a rough sea, but later surprised that the tanker did not sink, returned to her and managed without bearings, to bring her to port.

NATION-WIDE PASSES SENATE

SUBMISSION OF ISSUE GETS 65
FOR, TO 20 AGAINST IN
UPPER HOUSE.

BECKHAM YES. JAMES NO

Amendment To Be Ratified By States
Within Six Years, Certain To
Pass House.

Washington, Aug. 1.—A resolution for submission to the States of a prohibition amendment to the Federal constitution was adopted late today by the Senate. The vote was 65 to 20, eight more than the necessary two-thirds.

As adopted the resolution contains a provision that the States must be asked to ratify the amendment within six years. The House still must act on the resolution.

Senators opposing the resolution were:

Democrats—Broussard, Culberson, Gerry, Hardwick, Hitchcock, Hustling, James, Lewis, Phelan, Pomerene, Reed and Underwood. Total 12.

Republicans—Brandegee, Calder, France, Lodge, Penrose, Wadsworth, Warren and Weeks. Total 8.

Total against 20.

Senator Beckham was in his element today when national prohibition passed the Senate. He not only voted bone-dry on every amendment, as well as the main issue, but he made a speech that contained a note of exultation over the triumph of the cause for which he has long fought.

"If a dozen or more years ago," said he, "any man had predicted such an event as this he would have been considered an idle dreamer or possibly a lunatic. No one can now stand before an intelligent audience and defend the existence of the saloon. That evil institution is now recognized as one without a saving grace, and as the chief breeding place of human misfortune and tragedies. If, therefore, the saloon is bad, what good can there be in the distillery or the brewery, whose business it is to manufacture supplies for the saloon. If the one is abolished why should the other remain?"

Majority in House Predicted.

The proposed constitutional amendment is the first initiated by Congress since that providing for popular election of United States Senators, approved in 1911. It is the first time that either branch of Congress has approved a constitutional amendment for prohibition. A few years ago a similar resolution in the House received a majority but failed of the required two-thirds.

Prohibition leaders of the House now claim enough votes to insure submission of an amendment to the States. When the resolution can be considered in the House is uncertain, but its friends will seek early discussion.

The Senate's action today came after three days' debate. All efforts to amend the resolution failed for the addition of Senator Harding's amendment fixing the six years' time limit within which three-fourths of the States must ratify the amendment to make it effective. This was approved, 56 to 23.

As adopted, the resolution, which was submitted by Senator Sheppard, of Texas, Democrat, would add the following article to the Federal Constitution:

"The manufacture, sale, or transportation of intoxicating liquors within, the importation thereof into, or the exportation from, the United States and all territory subject to the jurisdiction thereof, for beverage purposes, is hereby prohibited.

"This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the Legislature of the several States, as provided in the Constitution, within six years from the date of the submission hereof to the States by the Congress.

"The Congress shall have power to enforce this article by appropriate legislation."

Altho most of the debate on the resolution had been perfunctory, the usual scenes marking the end of warmly contested fights were re-

Continued on page four.)

DRAFT BOARDS GRAVE TASKS

GEN. CROWDER WARNS LOCAL BOARDS OF ONEROUS DUTIES.

FAIRNESS WATCH-WORD

Exemption Bodies Great Sacrifices, Life and Death Hinge On Their Actions.

Washington, July 30.—The gravity of the task which faces members of local draft exemption boards is called to their attention in solemn language in a communication sent broadcast by the War Department and made public tonight by Provost Marshal Gen. Crowder.

"The selected man offers his life," says Gen. Crowder. "It will strengthen you to remember that for every exemption or discharge that is made for individual convenience, or to escape personal loss of money or property, or for favor or affection, some other man whose time would not otherwise have come must incur the risk of losing his life."

The boards are told they are not courts to adjust differences between two persons in controversy. "You, acting for the Government," says the communication, "are to investigate each case in the interests of the Nation, and never in the interests of the individual." Gen. Crowder closes with the declaration that the Nation needs men quickly and the boards will receive little praise and some blame. "Your only reward," he said, "must be the knowledge that at great personal sacrifice you are rendering your country an indispensable service in a matter of the utmost moment."

President Wilson tonight issued an executive order directing Government officials to exercise "the greatest care" in issuing exemption affidavits to employees in the civil executive departments, emphasizing the high national importance of carrying out "the spirit of the selective service act and of securing its fullest effectiveness by holding to military service all drafted men who are not absolutely indispensable to department work. He says discharges should be reduced to "the minimum number consistent with the maintenance of vital national interests during the emergency war."

No Favored Class.
"It is earnestly hoped, moreover," the order concludes, "that, acting in the same spirit as the Federal Departmental officials, all citizens, who may be called upon, as employers, under Section 41 of the regulations, to make affidavits for securing the discharge of persons deemed to be indispensable to national industrial interests during the emergency will exercise the same conscientious and scrupulous caution, to the end that there will appear to be no favored or exempted class among the citizens called by law to the national defense."

Gen. Crowder's communication, mailed to all boards, reads as follows:

"You are entering on a difficult task the gravity of which is beyond anything that can be said in the way of discussion. You realize the significance of what you are to do, and you know that responsibility, heavier, perhaps, than any you have ever faced, is upon you."

"War demands individual sacrifice to the common cause. No people ever approached war with calmer appreciation of that sacrifice or a firmer resolve to bear it and to present themselves to be classified for service in the place to which it will best serve the common good to call them. This calm determination could not exist were it not for the confidence of the Nation in its institutions. In this public confidence is found the very spirit of a selective service law. The most sacred rights of country home and family are entrusted for adjudication to local citizens and officials, nominated by State Governors and appointed by the President. The most equitable rules that could be devised have been prescribed for guidance, and the administration of these rules and the sacrifice that is offered by your neighbors is entrusted to your hands."

Sacrifice Demanded.

"From every one is demanded a sacrifice. But there is one thought to be kept always in your mind. The selected man offers his life. There is no greater giving than this; and that thought should guide you always. There may be a few who will urge upon you claims for exemption or discharge that, whatever may be your inclinations of sympathy or affection, you will know ought not to be granted. It will strengthen you to remember that for every exemption or discharge that is made for individual convenience, or to escape personal loss of money or property, or for favor or affection, some other

man whose time would not otherwise have come must incur the risk of losing his life.

"There can be no room for hesitation in such a case."

"Another fundamental thought is this:

"You are not a court for the adjustment of differences between two persons in controversy. You are agents of the Government engaged in selecting men for the Government and there is no controversy. You, acting for the Government, are to investigate each case in the interests of the Nation, and never in the interests of the individual. There is not one exemption or discharge in the law or regulations that is put there for the benefit of any individual. All are there for the benefit of the Nation and to the end that the whole Nation may be a team in which each man shall play the part for which he is best fitted."

Act On Affidavits.

"Therefore, no one has a vested right, by himself or by attorneys, to urge, by argument or pleading, his individual case upon you. You should rigidly exclude this. Ordinarily you should act on the affidavits. If you desire more information you may proceed to get it. If you doubt the affidavits you may interrogate other persons. If you desire more proof you may get it. But no claimant has a right to submit other proof than that called for by regulations or than that you may call for."

"There should be no rules like those of court procedure, no technical rules of evidence. You should proceed to investigate cases about which you are not satisfied exactly as you, as an individual would proceed to inform yourself of any fact about which you are in doubt."

"Last of all, it is important to say a word about your own sacrifice. The place to which you have been called is one which no man would seek save in the performance of one of the highest of patriotic duties."

No Remuneration.

"There is not, in any real sense, any remuneration. Because thousands of citizens urged that members of local boards should not be placed in a position of performing their grave duties, for pay, the regulations provide that, ordinarily, the service shall be uncompensated. Because it was not desired that any man be prevented from rendering the service by the necessity for earning his daily bread, a small remuneration was provided."

"The Nation needs men, and needs them quickly. The hours will then be long and the work absorbing. The duty is always to take and never to give, and human nature is such that will be little praise and some blame. The sacrifice of many of these whose cases are to be decided is no greater than that of the men who are to decide them; and your only reward must be the knowledge that, at great personal sacrifice, you are rendering your country an indispensable service in a matter of the utmost moment."

Chronic Constipation.

It is by no means an easy matter to cure this disease, but it can be done in most instances by taking Chamberlain's Tablets and complying with the plain printed directions that accompany each package.

PARROT WINS RECRUITS FROM STREET CROWDS

New York, July 30.—"You're a slacker."

"You're a liar, and if you say that again I'll knock the bloomin' head off your shoulders."

Dialogue such as this right out loud on Broadway, naturally causes amazement. One of the parties in the affair is an Arizona blujacket. The party of the second part is anybody that happens to resent being called a slacker.

It came about in this way: Jack is ashore to win recruits for the navy. As he strolls up and down Broadway in the theater district in the evenings perched on his shoulder is a green and golden parrot who also has enlisted in the cause for recruiting. At a given signal from Jack, Polly screeches: "You're a slacker!"

The person thus accused stops in his tracks and thinking it was the sailor who insulted him, starts to say what he thinks when Polly pipes up: "Joined yet?" This ends it all.

Bad Cough? Feverish? Grippy?

You need Dr. King's New Discovery to stop that cold, the soothing balsam ingredients heal the irritated membranes, soothe the sore throat, the antiseptic qualities kill the germ and your cold is quickly relieved. Dr. King's New Discovery has for 48 years been the standard remedy for coughs and colds in thousands of homes. Get a bottle to-day and have it handy in your medicine chest for coughs, colds, croup, grippe and all bronchial affections. At your druggist, 50c.

Children Cry FOR FLETCHER'S CASTOR OIL

U-BOATS HOLD STAGE IN WAR

THIRD YEAR OF CONFLICT AND NO BIG NAVAL BATTLE.

DIVERS FORCE SPENT

Military Experts Declare Submarines Have Done Their Best and Have Failed.

New York, July 29.—On the sea the third year has not witnessed a single major engagement between big war ships, but the center of the stage has been taken by submarine operations unprecedented in the history of the world, on which the Germans admittedly depended for victory.

Adopting the famous American Admiral Mahan's theory that all great wars are decided by sea, the German war leaders decided they could make up for lack of a decision on land by cutting the water supply lines of the Allies and forcing a victory thru starvation.

Enough has been experienced of the submarine warfare, however, to convince the Entente nations they can retain their vigor in spite of it. Falling hopes of success are plainly perceptible in Berlin.

Submarine sinkings were numerous last summer, rising, according to German accounts, to 408,500 tons in November and 439,500 tons in January last. With the inauguration of ruthless submarine warfare on February 1, German speakers declared the sinkings would climb to over a million tons a month and would continue to grow.

U-Boat Toll Falling.

In stead of showing a regular and alarming increase, however, the list of ships sunk has risen and fallen irregularly and now shows signs of sinking to the rate of the period before Germany announced she would sink friend or foe without warning.

The number of British ships of over 1,600 tons announced sunk weekly from March 4 was as follows: 14, 12, 16, 15, 17, 19, 40, 38, 24, 18, 18, 15, 22, 27, 21, 15, 14.

The submarines for a while had the Allies distinctly worried. That was in the two weeks of March, when forty and thirty-eight British ships of over 1,600 tons were acknowledged sunk. If this rate had kept up Germany might well have won the war or forced a draw. Destruction soon fell to less than half this rate, however.

The change was due to the increased proportion of merchantmen armed, to the clearing of the seas of slower craft, to better defensive and offensive methods on the part of the allied patrol and to the aid of an American destroyer fleet operating off the coast of Ireland and in the steamboat lanes between the United States and France.

That the danger from the submarines is definitely over can not be stated. Germany is feverishly building more and bigger U-boats of improved designs and her skippers are becoming more skillful in their dastardly work. A story that the latest design calls for a 6,000 ton boat mounting many big guns and forty torpedo tubes may be dismissed as fantastic, but the "submarine cruiser" is probably an important factor of the near future.

Meanwhile, American and other inventors are working literally night and day on means to detect and combat the submarine. The great Edison drives his force of inventors and his remarkable own brain eighteen hours a day, concentrating on the most important problem of his life. The world is thinking submarines. Something startling should be the result.

It is difficult to estimate how much merchant tonnage has been sunk in the war. Capt. Persius, a leading German writer, declares the total amount of allied and neutral shipping destroyed by the Teutons up to April 1, last was 6,641,000 tons. This is undoubtedly an extreme statement and allied estimates are much smaller.

Adding 600,000 tons each for the five months of ruthless warfar since April 1, to Persius' estimate we get a total of about nine million five hundred thousand tons. This is a very rough approximation. The German information must be imperfect, because submarines often do their work hurriedly and their commanders are not exactly sure what they are sinking. Moreover, the Germans can not have precise information as to the destruction by mines, which has been large.

On the allied side the totals of sinkings are not given out in such a form that a satisfactory calculation of the total can be made; but the volume of exports and imports at im-

portant points shows that the Entente nations are carrying on almost as large a business, if war freight is included, as in normal times.

Since the great, but inconclusive, battle of Jutland, on May 31, 1916, the battleships and battle cruisers have not had a chance to show their prowess, that should the submarine war fail the Germans will again leave their protecting harbors and try their might against the British. An even greater battle than the one off Jutland would be the result.

U. S. Pledges Aid.

American war ships may take part in this vast engagement. It is not permitted to state where the American battle fleet lies at this moment, but America's word to assist her Allies with every means in her power is assurance that our fourteen-inch rifles will be ranged alongside Admiral Beatty's big guns whenever it is considered advisable to put them there.

Indeed, the activity of the American main fleet in the North Sea is so probable that rumors (undoubtedly started by German agents of a great sea disaster found ready credence this spring. These unfounded stories had it that the United States fleet had met the Germans, been worsted and lay for the most part on the bottom of the ocean. The reports stirred up such widespread uneasiness among the masses of the people that an official denial was thought advisable.

The last year has seen many brushes between opposing light forces in the North Sea. In one spectacular engagement two destroyers locked, the British sailors pouring onto their opponents' craft and routing them with cutlasses in the fashion of bygone centuries.

A British fleet pounded the German harbor of Zeebrugge to pieces and damaged the left end of the Teuton battle line resting on the North Sea.

Makes Entente Secure.

The entry of the United States into the war, with the third largest navy in the world, has rendered the position of the Entente nations much more secure on the sea. British patrols along the Atlantic coast of North and South America have mostly been replaced by American boats, leaving the English craft free for work nearer home. The United States is building 300 submarine chasers and an unstated, but undoubtedly large, number of hydro-aeroplanes for the campaign against the U-boat.

On August 1, 1916, the first merchantman submarine, the Deutschland, left Baltimore homeward bound. She reached Germany safely and then made a second transatlantic trip—this time to New London, Conn. The entry of the United States into the war prevented a third trip. Meanwhile, a sister ship, the Bremen, seems to have met disaster on her way here.

A spectacular feat was performed by the fighting submarine U-53, which came into Newport, R. I., on October 7 last, stayed a few hours and then put to sea. She sank five merchantmen off Nantucket Lightship the next night, the passengers and crews being rescued by a fleet of American destroyers. The Germans announced later the U-53 had reached home in safety.

The year was also signalized by the sinking of several hospital ships unwarned by the Germans. Among these was the Brittannie, the largest British vessel afloat, which was destroyed in the Aegean November 21. The Germans announced that in the future they would not warn any hospital ships except those sailing at certain specified times and taking prescribed routes.

On November 23 the Russian dreadnought Imperatritsa Maria was sunk by an internal explosion and 200 lives were lost.

The German cruiser Moewe made a successful raid in the South Atlantic. On January 17 it was learned she had sunk twenty-one ships and captured three others. Part of her prisoners she allowed to land at South American ports and part she sent to Germany on board the prize ship Yorwdale. She herself reached Germany safely.

The greatest feat of Germany on the sea, however, was accomplished by her ruthless submarine war she brought the United States into the war as her enemy this spring. The Americans immediately started a vast shipbuilding program, which may undo for Germany all the work of the U-boats.

Sprains And Strains Relieved.

Sloan's Liniment quickly takes the pain out of strains, sprains, bruises and all muscle soreness. A clean, clear liquid easily applied, it quickly penetrates without rubbing. Sloan's Liniment does not stain the skin or clog the pores like mussy plasters or ointments. For chronic rheumatic aches and pains, neuralgia, gout and lumbago have this well-known remedy handy. For the pains of grippe and following strenuous work, it gives quick relief. At all druggists, 25 cents.

Telephone Courtesy

The people who get the greatest amount of good out of their telephone are those who talk over it as though face to face.

Courtesy smooths out difficulties and promotes the promptest possible connections.

The operators of the BELL System are trained to be patient and polite under all circumstances, but they will do better work if they meet with patience and politeness on the part of the telephone users.

The fact that you cannot see the operator or the other party should not cause you to overlook this. The best results come through the practice of mutual courtesy.

The voice with the smile wins

Monterey County Needs Good Farmers

Notwithstanding the fact that Monterey produces millions of dollars worth of potatoes, sugar beets, apples, peaches, barley, alfalfa, dairy products, live stock, etc., there is much land that only needs farmers and settlers to make it more intensively productive. This is a rich coast county with a mild even climate.

YOU CAN SEE THIS COUNTRY WITHOUT LEAVING HOME

We have issued a beautifully illustrated booklet telling of Monterey County, and the opportunities there for YOU. Send us ten cents for this booklet and a sample copy of Sunset Magazine—the one big National Magazine telling of the life and development of the West. Address,

SEE VICTORY IN AIR

Greatest Strides Have Been Made In
Development of Air Craft
Battlers.

New York, July 28.—Aviation has made vast progress in the third year of the war. The keen competition in the great struggle has been responsible off this remarkable advance. Various types of airplanes have supplanted each other in quick succession. No sooner has a new type been designed than a faster plane has been built.

The progress of aviation has emphasized more sharply the absolute need of planes and dirigibles for the army and navy. Time after time battles have been won and lost, concerted drives held back or pushed ahead, because of the aeroplanes.

Battles have been fought in altitudes ever rising to the present record of some 16,000 feet above the level of the sea and there has developed a dexterity in manipulating machines in the air such as but few men dreamed of a few years back.

Early in the fall of 1916 the race between the Allies and Germany in the air fight became keener than ever. Experts speeded up their efforts to improve existing types of planes with the result that old machines were either sent back to the training camps or to the junk pile; more and more men were gained in for training as aviators, and factories were told to hustle as they never had before.

This boom in aviation was further augmented by the entry of the United States in the war. Factories capable of producing aeroplanes, but keeping aloof because the United States was not involved, changed their position as might have been expected, and prepared to turn out planes by the hundred to aid in the defeat of Germany.

See Victory In Air.

It was the virtually unanimous opinion among military authorities that an influx of thousands of American aeroplanes with trained aviators along the western front would beat Germany without question. It was explained that they could raid the German depots and munitions centers and cause such damage as to force Germany to sue for peace.

The Fokker was the first plane produced under the exigencies of the war situation; it had high speed, and with it was introduced the idea of firing bullets from a machine gun thru the propeller of the machine. Later the Fokkers were made useless by new British machines, and these were inferior to new German types, and so on.

All the god points of the war machines, combined with latest developments by foremost scientists and inventors of all the Powers, have been made over ever few months into a still newer type. The latest German battleplanes are known as "Two Tails" and "Hans and Fritz"—huge tractor biplanes of 200 horsepower manned by two gunners and a pilot. They worked with great success until

WOMEN OF MIDDLE AGE

Mrs. Quinn's Experience
Ought to Help You Over
the Critical Period.

Lowell, Mass.—"For the last three years I have been troubled with the Change of Life and the bad feelings common at that time. I was in a very nervous condition, with headaches and pain a good deal of the time so I was unfit to do my work. A friend asked me to try Lydia E. Pinkham's Vegetable Compound, which I did, and it has helped me in every way. I am not nearly so nervous, no headache or pain. I must say that Lydia E. Pinkham's Vegetable Compound is the best remedy any sick woman can take."—Mrs. MARGARET QUINN, Rear 259 Worthen St., Lowell, Mass.

Other warning symptoms are a sense of suffocation, hot flashes, headaches, backaches, dread of impending evil, timidity, sounds in the ears, palpitation of the heart, sparks before the eyes, irregularities, constipation, variable appetite, weakness, inquietude, and dizziness.

If you need special advice, write to the Lydia E. Pinkham Medicine Co. (confidential), Lynn, Mass.

the French avions came along. Build Special Destroyers.

The first of these was also two hundred horsepower; it mounted a thirty-seven millimeter quick-firer gun aimed by maneuvering the whole airship, and for a brief spell it was master of the air. Then came big German machines with a gun firing grapeshot, in addition to two machine guns. They were too fast for the Avion to catch. France came back with a special aeroplane destroyer—"The Avion du Chasse"—simply a racing aeroplane.

So keen has become this competition that the number of casualties has depended, to a great extent, on the placing of the gun. The French brought down many of the enemy by mounting the gun on top of the plane. The Germans, in their latest venture, have followed this lead and added to it a rifle that is swivel so that they can shoot backward as well as to either side.

So fast has been the race between the contesting Powers that neither can get a commanding position in the air. Superiority in numbers has but little connection with actual supremacy, because quality counts for so much and the standard is raised so rapidly.

Hope was entertained when America, first entered the war that aerial aid from this country would suffice to place such a large number of planes on the front as to enable the long-thought-of raids on interior Germany to take place.

Steps were taken to rush an appropriation thru Congress for more than \$600,000,000. Factories were surveyed for their ability to turn out flying machines and other somewhat hurried preparations were made. But the work seemed distressingly slow.

The situation now appears gradually changing, and with aeronautical experts assisting the Government and with all the money necessary to develop our air resources for a year at least, most observers believe the U. S. will in a few months or a year be a big factor in air warfare.

Zeppelin raids on England continued for part of the last year, then the Germans seem to have suddenly given them up on account of the heavy losses involved. The English fliers in their fast aeroplanes found it easy to bring down the bulky and comparatively low gas bags.

Instead of dirigibles, the Germans began to use against London and other English centers large squadrons of their newest aeroplanes. These the British found it difficult to catch and attack in force.

On May 26 German bombers killed seventy-six persons in Dover and Folkestone. On June 13 the greatest air raid London had experienced took place. A squadron of Teuton fliers killed 153 persons and wounded 430, largely women and children.

Carries Four Guns.

Germany sent over a new type aeroplane of giant size called the Gotha to raid London July 7. Each of these enormous mechanical birds mounted four guns. They were so large that, flying over the metropolis at 13,000 feet altitude, the populace thought them unusually low and daring. The result of the raid was 43 killed, 197 injured.

The principal object of these latter seems to have been to draw British air forces from the west front, where they are superior to the Germans, for the defense of the capital. The Germans figured rightly that there would be a storm of demand on the part of Londoners for better air defenses.

Every great battle on land now sees a second battle in the air above. The British officially announced that an engagement between air forces July 12 on the west front was "the most severe experience since the commencement of the war."

As a result thirty German and nine British machines were brought down.

Summer Complaint.

During the hot weather of the summer months some member of almost every family is likely to be troubled with an unnatural looseness of the bowels, and it is of the greatest importance that this be treated promptly which can only be done when the medicine is kept at hand. Mrs. F. F. Scott, Scottsville, N. Y., states, "I first used Chamberlain's Colic and Diarrhoea Remedy as much as five years ago. At that time I had a severe attack of summer complaint and was suffering intense pain. One dose relieved me. Other members of my family have since used it with like results."

Owens Millions In U. S.

Petrograd, July 29.—The commission appointed by the provisional Russian government to investigate the private fortune of the deposed Czar has ascertained that the ex-ruler during the last ten or fifteen years bought American securities to the value of many millions of dollars.

The ex-Czar is said to have invested \$50,000,000,000 in the Pennsylvania Railroad, \$10,000,000 in the New York Interborough Rapid Transit Company, \$5,000,000 in the Baltimore and Ohio Railroad.

KING SPENDS WEEK IN NAVY

HIS ENGLISH MAJESTY HOLDS
INVESTITURE ABOARD
BATTLESHIP.

London, July 28.—The King recently spent a week with the British navy, much to the delight of the officers and the men. His majesty arrived at an important base during a thunderstorm and his entire visit was attended throughout by the sort of weather that has made a long vigil in the North Sea an example of endurance without parallel.

The King held an investiture, witnessed three or four marches and a whole day of gun practice, meanwhile making an exhaustive study of the latest type of submarines and visiting the mine-sweeping sloops and trawlers.

The investiture being at sea and in the midst of naval rather than military uniforms, was unusually picturesque, and it was remarkable also as the first there has been on a ship for many years, some say even a hundred. In other respects it was similar to the investitures at Buckingham Palace.

Honors Read Out.

Commander Sir Charles Cust, Naval A. B. C., read out the honors and the names of the recipients; Maj. Lord Cromer, equerry, handed the King the decorations on a velvet cushion, and his majesty affixed them either over the neck or to the breasts of those whom he had chosen to distinguish.

When rear Admiral Hugh Evan Thomas, of the Fifth Squadron, came forward to be knighted, Prince Albert very gracefully placed the hussack for him to kneel upon, and Admiral Beatty's sword, at his own particular request, was used by the King to confer the accolade. Among those who had not been prepared for this striking compliment from the Commander-in-chief to the man who gave him such invaluable help at the battle of Jutland there was something of a thrill when Admiral Beatty, standing by the King's side, drew his sword and held it in readiness.

King Shakes Hands.

His majesty shook hands with all the recipients of honors and to those who came from the lower deck he addressed a few words as well. The mine-sweeping crews, more especially the Dogger Bank fishermen, who when they took to their industrial sea life little imagined into what strange adventures and dangers it would lead them, were greatly delighted by the King's long visit to their vessels.

His hour in the latest of the British submarines was the most interesting in the whole visit, but it was the one of which the least may be said. No harm, however, and perhaps some good, can be done by stating the fact that in the latest type more provision is made for the comfort of the submarine crews than ever before, and in the officers' quarters there is even the luxury of a bathroom.

Stop Left Over Coughs.

Dr. Bell's Pine-Tar-Honey will stop that hacking cough that lingers from January. The soothing pine balsams loosen the phlegm, heal the irritated membrane, the glycerine relieves the tender tissues, you breathe easier and coughing ceases. Don't neglect a lingering cough, it is dangerous. Dr. Bell's Pine-Tar-Honey is antiseptic and pleasant to take, benefits young and old, get it at your druggist to-day. Formula on bottle. 25c.

REJECTED 13 TIMES, ARMY NOW TAKES HIM

New York, July 29.—Nothing is so successful as persistence when a man really wants to help Uncle Sam "Can the Kaiser." Like the young Brooklynite who recently ate his way into the naval militia, F. J. Fitzpatrick, rejected thirteen times by the army and navy, Marine Corps and National Guard, for physical unfitness, has finally exercised himself into the first battalion of the Signal Corps. Immediately after being accepted he was placed on exhibit in the midday minute meeting for recruiting in Chambers Street.

KING GEORGE INSPECTS U. S. REGIMENT OF ENGINEERS

London, July 30.—King George, accompanied by Queen Mary and Princess Mary, went by motor to the Borden Camp and inspected the American troops quartered at the outlying camps. His Majesty was delighted with the soldierly appearance of the men. A court circular issued from the royal pavilion at Aldershot says:

"The King, accompanied by the Queen, Princess Mary and Field Marshal the Duke of Connaught, drove to the American camp at Borden this morning and inspected the

regiment of engineers of the United States Army under command of Col. Charles H. McKinstry."

Strike Called Off.

Chicago, July 30.—The strike of switchmen belonging to the Brotherhood of Railroad Trainmen, involving more than 2,500 men in the Chicago switching district, which began Saturday at 6 a. m., was called off shortly before 6 o'clock this morning, after an all-night conference between representatives of the involved.

The men will return to work at once.

Embargo Is Raised.

Mr. E. H. Bacon, of the Monon railroad, received word this morning from the Monon headquarters in Chicago that the embargo on freight in carload and less than carload lots through Chicago has been raised. It has been imposed because of the switchmen's strike.

Clear Your Skin in Spring.

Spring house cleaning means cleaning inside and outside. Dull pimply skin is an aftermath of winter inactivity. Flush your intestines with a mild laxative and clean out the accumulated wastes, easy to take, they do not gripe. Dr. King's New Life Pills will clear your complexion and brighten your eye. Try Dr. King's New Life Pills to-night and throw off the sluggish winter shell. At druggists, 25c.

U. S. TRANSPORT IS RAMMED AT ANCHOR

HOLE KNOCKED IN SARATOGA
BY THE STEAMSHIP
PANAMA.

An Atlantic Port, July 30.—The American transport Saratoga, at anchor waiting sailing orders was rammed by the Panama, an inbound American steamship here to-day. The transport headed toward the beach in a sinking condition.

Meanwhile those on board were safely taken off in lifeboats or by tugs and other craft in the harbor, which responded to distress signals. So far as is known no one was injured.

A deep hole in the transport's port quarter extending from below the water line to the rail resulted from the collision. The captain of the steamer which did the damage held the bow of his ship tight against the transport, effectually blocking the wound. In this position he kept his vessel until all on board the transport were taken off.

More than a dozen vessels, including an American cruiser, were in the rescuing fleet. A number of them surrounded the transport after the other steamship drew away and supported her until she reached shallow waters two miles distant.

The Saratoga is a former Ward Line steamer. The Panama belongs to the Panama railroad steamship line.

Ask Anyone Who Has Used It.

There are families who always aim to keep a bottle of Chamberlain's Colic, Diarrhoea Remedy in the house for use in case it is needed, and find that it is not only a good investment but saves them no end of suffering. As to its reliability, ask anyone who has used it.

KERENSKY IS OFF FOR FRONT AGAIN

Petrograd, July 30.—Premier Kerensky has again started for the front. His destination is army headquarters, where he will hold a conference with the commanders on the various fronts and also with Generals Alexieff, Ruzsky and Gurke and former War Minister Gutchkov. At the conference it will be decided whether M. Kerensky will retain his portfolio of War Minister.

Admiral Kolchak, former commander of the Black Sea fleet, is mentioned in connection with the Ministry of Marine, a post also held by M. Kerensky.

Wholesale Executions.

London, July 30.—The correspondent of the Times at Russian Southwest Headquarters, after describing the desertions and panic of the Russian troops, says Gen. Korniloff's measures against indiscipline have been approved and that he is executing deserters by the wholesale.

Starck Pianos

No Money in Advance—Satisfaction Guaranteed—Lowest Net Factory Prices—Easiest Terms—A Saving of \$100 to \$200—From Factory Direct

30 DAYS' FREE TRIAL IN YOUR OWN HOME

We will ship you a beautiful Starck Piano for 30 days' free trial, in your home. No cash payment required. All we ask is that you will play upon, use and test this piano for 30 days. If, at the end of that time, you do not find it the highest grade, sweetest toned and finest piano in every way, that you have ever seen for the money, you are at perfect liberty to send it back, and we will, in that event, pay the freight both ways. The Starck Piano must make good with you, or there is no sale.

Save \$150.00 or More
We ship direct to you from our factory, at prices that save you upwards of \$150.00 in the cost of your piano. We guarantee to furnish you a better piano for the money than you can secure elsewhere. You are assured of receiving a satisfactory sweet toned durable high grade piano.

Easy Payments
You pay no cash down, but after 30 days of trial, you can begin payment on the lowest, easiest terms ever suggested by a piano manufacturer. These terms are arranged to suit your convenience, and it is possible for you to buy a piano for your home, without missing the money.

Starck Player-Pianos
Starck Player-Pianos are the best and most beautiful Player-Pianos on the market. You will be delighted with the many exclusive features of these wonderful instruments, and will be pleased with the very low prices at which they can be secured.

Piano Book Free
Send today for our new beautifully illustrated piano book which gives you a large amount of information regarding pianos. This book will interest and please you. Write today.

35-Year Guarantee
Every Starck Piano is guaranteed for 35 years. This guarantee has back of it our 35 years of piano experience, and the reputation of an old-established, responsible piano house.

50 Free Music Lessons
To every purchaser of Starck Pianos, we give free music lessons, in one of the best known schools in Chicago. These lessons you can take in your own home, by mail. This represents one year's free instruction.

2nd-Hand Bargains
We have constantly on hand a large number of slightly used and second-hand pianos of all standard makes taken in exchange for new Starck Pianos and Player-Pianos. The following are a few sample bargains:
Weber \$110.00
Steinway 92.00
Chickering 90.00
Kimball 85.00
Starck 195.00
Send for our latest complete second-hand bargain list.

TELEPHONES.
Cumberland 123
Farmers' Mutual 50

FRIDAY, JULY 27

There's many a slip twixt 6 o'clock a. m., and 4 p. m., on August 4th., A. D. 1917, so the signs indicate.

Poor old China, like Mexico, can't get her name on the front page more than once or twice in each month.

Will it be a bonnet or just a stiff katie, the Republicans will shie into the ring for Superintendent of Schools tomorrow?

One fellow says wipe the Submarines off the ocean, how can you with so much water in the way? They won't come ashore.

With coal at or near 8 cents at the mines, we see nothing to prevent the Barrons from permanently retiring after the war is over.

Only slight scattering damage was sustained by the heavy rain fall of last Thursday evening, and crops as a whole, are better throughout Ohio county, than for a number of years.

The red eyed wets and wet eyed dries in Congress have cost this country just about as much as all of the Pro-German plotters and spies put together. Let's interne the whole blooming bunch.

Some of the Russians drunk with imaginary freedom, since the overthrow of one despot, Nicholas, by their failure to fight invite a calamity of a graver character, perhaps. When Kaiser Bill voluntarily gives any portion of Russia freedom it will be

another great day for rejoicing. These rebellious Russians are getting a lesson in the hard school of experience.

On August 6, 7 and 8, an Agricultural Chautauqua will be held at Matanzas, and every farmer who can possibly do so, should attend this meeting. Scientific, or rather sensible farming, is the only kind that often pays. This meeting is for your good, Mr. Farmer. There is also something good for the women on the program. Mr. Browder, County Agent, deserves much credit for securing the able array of splendid talent to instruct and entertain at this, a real Farmers' Chautauqua.

Before we appear again, the Primary will have been an event of the past. It is presumed that the great majority of the candidates have made a fairly thorough canvass of the county, and of course rather anxiously await the battle of the ballots, all but a very few must lose. We hope and trust that, from the very great number aspiring to the various positions, the very best amongst the whole lot may be chosen on tomorrow to bear the battle and carry the banner to victory on November the sixth, next. While we may have our preferences, and do as a matter of course in most cases, yet the choice of the party shall be our choice, their fight shall be our fight and in the victory of the nominees, whoever they may be we hope to do our share, tho it may be little, in some manner we trust that we will be able to contribute our mite. And so, let each and every mother's son, candidate in tomorrow's primary resolve within himself, tho he may taste defeat, that it can't be said when the November election shall have past, and become history, that his opponent, the one successful on August the 4th, didn't get the best that I possessed. In no other way can one succeed, by no other method should a defeated candidate ever succeed. Faithfulness to a trust is the supreme trial of the most of us. He who remains true under normal conditions deserves reward and is more than apt to receive it somewhere along the journey, be it in politics, business or otherwise. Let not a single, solitary, whiney loser be found within the ranks of those who fall out on tomorrow.

Traces of radium have been discovered in the interior of Madagascar and a company formed to exploit the deposits.

(By Fluke McFluke.)

Lee Simmerman swears by all the powers in Coon Hollow, that, on his way up town to the show the other night he caught the master Bull frog of the whole Rough River valley. Lee says the aforesaid frog was at least two feet from tip to tip and weighed no less than 7 pounds.

Mr. John Thomas says that the woodpeckers have everlastingly made sieves of the smoke stacks of Capt. J. W. Ford and Ed. Lem & Co. Dr. Pirtle on learning of this inroad of the destructive pests, volunteered to put rubber tips on that portion of the said birds with which they do their pecking, provided they were brought to his office.

Aug. 2, '17: Ernest Birkhead is going to Owensboro today and along about 3 o'clock I'm gonna get about a dime's worth of lemberger, or limberger, (don't know how you spell it) but at any rate between us two, we are going to have an old fashioned Dutch lunch, with Birk doing the major portion in the Yellowbanks.

Hot? Gee whiz, a fellow's B. V. D's. feel like 12 ounce flannel and if it wasn't for the majesty of the law I would even discard those things.

My wife said she had always heard you could feed two as cheap as one, but after I had gnawed the corn off of the 5th cob the other day she lowed as how she would hate like blazes to feed a double team such as me. Said something about having me sheared up and putting me on the market while they were high. Wonder what she meant?

Silas Stevens and Joe Bellamy just are wondering whether it would be either of them, or just a common Smith, or merely a Wedding, or perhaps only a Martin, or maybe just a plain Cook, we were going to have in the County Judge's office during the next four years, and then Birks Tichenor was heard to remark, we May.

Primarily speaking, we guess along about this time next week we won't have 40 or 50 fellows putting that 6 horse power grip on our good right claw and at the same time landing on our left rheumatic shoulder with a regular Jack Johnson punch, ev-

ery time we turn around.

It's so tarnation hot this week that even the Devil has laid down on the column we dedicated to his truthful pen last week.

We admire the courage, but pity the judgment of some poor fellow who may challenge the right of some, whom we know, to vote to-morrow.

War the Controlling Force.
Tremendous recent earnings of the United States Steel Corporation and its present well nigh impregnable financial position should not be permitted to wink out of sight the fact that the corporation's present year was 1914, when it earned not even a full dividend for its preferred stock and nothing at all for the common.

That year, it will be remembered, witnessed the completion of a twelve-month of the Democratic Tariff law. That year also witnessed the beginning of the European war, with the unexplained business which it brought us. The war has continued a controlling force in American commercial development. The Democratic Tariff, perforce has been set aside.

But it is still on the statute books and when the war is over there will be more years for the steel corporation like 1914, unless that law is changed. And not for that only, but also for all American industries. —Albany (N. Y.) Journal.

NOTICE.
For the purpose of doing justice both to the United States and to the drafted men who are legally entitled to exemption, I will prepare, free of charge, such affidavits as are proper and necessary, for any one who applies to me for this service.
A. D. KIRK,
Attorney at Law,
Hartford, Ky.

Moonlight Picnic.
Miss Agnes Williams entertained a large number of her friends Friday evening at a moon-light picnic given in honor of Miss Bessie Jarnagin of Roanoke, La., and Miss Grace Shults of Shultztown.
Those invited assembled on the wide veranda and parlor and after the enjoyment of much good music the crowd adjourned to the base ball ground, which was beautifully lighted by numerous Japanese lanterns where these young people merrily played and sung until the wee small hours of the morning.

NATION-WIDE PASSES SENATE

(Continued from page one.)

enacted today. Brief, spirited speeches under a ten-minute limit, were made to crowded galleries, with the Senate sweltering in one of the hottest summer days.

Opponents Vote Yes.
On the final roll-call several Senators said to oppose prohibition voted for the resolution, desiring they said, to have the wet and dry battle transferred from the national capital to the States and to prevent prohibition propaganda from impeding other matters before Congress.

A sharp contest was precipitated over Senator Harding's amendment to limit time for State action, but it was supported by both wets and dries. Senator Borah urged a time limit of ten days, but his amendment was rejected, 61 to 19.

An amendment by Senator Stone requiring the Government to make compensation for losses to liquor manufacturers in carrying the proposed article into effect was defeated, 59 to 31. He insisted the provision would be but justice to the large interests affected and Senator Williams said contrary action would be "robbery."

Crater Lake Development.
Crater Lake, deepest, bluest and most marvelous rimmed and colored lake in the wide world, will be made more accessible to visitors this season than ever before. The new National Park Service has taken hold of its development in earnest and the first result is a fast daily automobile service from the railroad station at Medford, Oreg., up the picturesque Rogue River Valley, to the inn on the edge of the rim.

Another practical improvement is the building of a fine trail on an easy grade from the top of the volcanic rim down to the edge of the water. The former trail made the descent of a thousand feet exceedingly brief in duration; but the coming back was a feat that taxed the sturdiest lungs. Many visitors did not see the wonders of the lake from the launches on its surface because of the exhausting climb back to the inn. The new trail makes a detour among several highly scenic spots and reaches the waterside through a gentler and more beautiful canyon than the old. There

will also be additional launches on the lake.

Other new trails are being constructed to wonder places on the rim, and the rim road for automobiles is progressing.

J. S. GLENN, Attorney.

BALD KNOB.

July 31.—A large crowd from this place attended the singing convention at Prentiss last Sunday. It was estimated that there were about 1,500 present and seven choirs, which made good music and closed with the National hymn, "America." The next convention will be at Montzello, the fifth Sunday in September. There will also be one at Rosine on the same date.

Mr. and Mrs. Charlie Leach, of Horton, spent last week with Mr. Charlie Smith and family.

Little Miss Ruth Wallace spent Sunday with Little Miss Irene Crowder.

DELAY IN OPENING OF NATIONAL GUARD CAMPS

Washington, Aug. 1.—Delays in preparing national guard mobilization camps, the War Department announced today, will postpone their opening about two weeks.

J. C. ILER,
Hartford, Ky.
EXPLORER RETURNS AFTER QUEST OF LOST PARTY
Quebec, July 31.—Capt. Joseph E. Bernier, the veteran Arctic explorer who started on an expedition in July, last year, to attempt to rescue Vilh-jalmur Stefansson, who was reported lost in the Arctic regions, is returning on his ship, the Guide, according to reports reaching here today from the North shore of the St. Lawrence.
Capt. Bernier was sent out in July a year ago by the Canadian Geological Survey specifically to make surveys and explore for new land, but intended also to look for Stefansson. Last reports were that Stefansson, who left Victoria, B. C., in June 1913, purported to pass last winter at Winter Harbor, Melville Island.
Dr. Riley Commissioned.
Dr. Riley has been appointed and commissioned in the Medical Reserve Corps, U. S. Army, with rank of First Lieutenant. Dr. Riley does not know, or have any idea as to what particular Unit he will be identified with, but it is presumed he will be called at about the same time, perhaps with those who will answer the first call under the draft now in process.
Dr. Ford Passes.
Dr. E. W. Ford has received official notice that he passed the examination which he recently underwent for appointment to the Medical Officers Reserve Corps, U. S. Army.
Dr. Ford will be commissioned within a short time and will likely be called for active duty at an early date. This is the second of Hartford's physicians we are more than certain to lose, as Dr. Riley has already been commissioned.
Hottest Since 1873.
Albany, N. Y., July 31.—Residents of the city found no relief today from the hottest night since the Weather Bureau was first established in 1873. The lowest the mercury dropped during the early morning hours was 83, which set the record. To-day's noon temperature was 94 degrees officially, against 96 yesterday noon, and a maximum of 99.4 yesterday afternoon, but humidity of 63 today more than offset the slight drop.
Changes At Camp Stanley.
Lexington, Ky., July 31.—Lieut. Cecil B. Armstrong, Company B, Third Regiment, received notice that he has been detailed as Acting Quartermaster of the Kentucky brigade at Camp Stanley, following the removal of Quartermaster Jackson Morris to Hattiesburg.
Lieut. Daniel E. Showalter, Second Regiment, has been appointed camp inspector.
Lieut. R. A. Hill, United States Army, who has been conducting examinations here for the Officers' Reserve, has gone to Jackson to open an office for a similar purpose. Hill received notice just prior to his departure of his elevation to a Captaincy.
MOBILE PLANT TO TURN OUT 18 SHIPS FOR U. S.
Mobile, Ala., July 31.—The Kelly-Atchinson Construction Company, of Chicago, will begin building a big new ship-building plant in Mobile within a week and will construct eighteen composite steel and wood ships for the United States Shipping Board Fleet. According to President W. L. Kelly, the new industry will employ about 1,000 men. The first vessel is expected to be launched January 1.

NOTICE OF CONTRACT FOR BUILDING BRIDGE.

Notice is hereby given by the undersigned committee that on Thursday, August 9, 1917, and about the hour of 1 o'clock p. m., at the court house in Hartford, Ohio county, Ky., contract for the construction of a span bridge will be let to the lowest and best bidder, the bridge to be constructed across the public ditch on Owensboro and Leitchfield road, or the road known as the Fordsville and Whitesville road at Coleman bridge and not far from the lands of M. F. Reynolds and Foster Reynolds; the bridge to be of steel span and concrete abutments; the plans and specifications of same prepared by the Department of Public Roads of Kentucky, are on file in the office of John B. Wilson, Judge of the Ohio County Court, Hartford, Ky., and also on file in the office of the Commissioner of Public Roads, Frankfort, Ky., to which plans and specifications reference is hereby made for a more specific description of said bridge.
Bidders will be required to submit sealed bids, give bond with good and approved security for the faithful performance of their contract of construction and right is reserved to reject any and all bids.
Hartford, Ky., July 24, 1917.
JOHN B. WILSON,
BEN W. TAYLOR,
B. F. RICE,
30-12 Committee.

SPY SUSPECT HELD TO U. S. GRAND JURY

Lexington, Ky., Aug. 1.—George Majors, alleged German spy, who was arrested at Paris and brought to the Lexington jail for safe-keeping, following an attempt to escape from the Paris jail, was held to the Federal Grand Jury today after a preliminary examination before United States Commissioner S. S. Yantis. His bond was fixed at \$1,000 which he was unable to give. The technical charge against him is impersonating a U. S. soldier, he having been informed as an infantryman when arrested.
Majors told of his meeting with the so-called Capt. Cutts, for whom he was working, and claimed that he had formerly lived in Harrison County, this State. He said he was rejected for enlistment at Fort Thomas. He said he signed some papers furnished by the Captain and that they went to Newport News, Va., whence they

sailed for Porto Rico. He said they came back from Porto Rico, went to Covington and then went north, returning to Frankfort, where they established headquarters.
May Holland, Frankfort, said Majors visited her several times in June and July, and that he told her he was acting as an orderly sergeant to an army Captain.
Farmers Chautauqua.
In the beautiful grove at Mantanzas on the Pt. Pleasant road, Ohio county, surrounded by a wide-awake progressive and prosperous people, we will hold a real Summer Farmers Chautauqua, three splendid days—Monday, Tuesday and Wednesday, August 6, 7 and 8, beginning at 9:30 each day.
We will have some of the best Agricultural men and women in the State with us at this meeting and it will be interesting all the way through to old and young. Every one is invited to come.
Some of the noted speakers we will have on this occasion are Dr. Fred Mutchler, Supt. Extension Work will speak on Co-operation; Miss Mary E. Sweney, Home Economics; M. O. Hughes, Asst. Supt. Extension, Farm Management and Alfalfa; Prof. T. R. Bryant, Animal Husbandry; Prof. N. R. R. Elliot, Horticulture; J. E. Grider, Home Dairy and Butter Making; Prof. W. D. Nichols, Commercial Dairying; A. S. Chaplin, Poultry; B. G. Nelson, Boys' Club Work, and others from a distance besides some home talent.
This meeting is free to everyone. And we hope you will come and bring your whole family and spend the whole time each day. You can bring your lunch or get a lunch at the lunch counter very reasonable. Come and enjoy three big days and go home better fitted for the duties of life. Mantanzas welcomes you.
102 Degrees In Cleveland.
Cleveland, O., July 31.—Weather officials said today no relief from Cleveland's record-breaking heat wave can come before Wednesday night. The Government kiosk on the public square at noon today registered 102 degrees. Fourteen deaths and a score of prostrations from the heat are the toll so far of the heat wave.
What Of It?
Wife: "The paper says that nitrates are higher."
Hub: What do we care. We never telegraph anywhere."

Farm Department

Home Storage.

(Irish potatoes.)
Irish potatoes can be stored in pits, root cellars, or above-ground, frost-proof storage warehouses. Small quantities, or even carload lots of potatoes are often placed in pits in the field when other storage facilities are not available. Immature potatoes can not be successfully stored for any considerable period even in the pits or cellars, and should never be pitted or buried. Well matured tubers of either early or late sorts, if sound and in a dormant condition upon the advent of freezing weather in the autumn, may be kept until required for table use or for planting by pitting, storing in potato cellars, of which there are many designs, or in above-ground, frost-proof buildings. The commercial storage of Irish potatoes is discussed in Farmers' Bulletin 547, Potato Storage and Storage Houses.

Sweet Potatoes.

Sweet potatoes should be thoroughly matured before harvesting, dug while the ground is dry, carefully handled, and thoroughly cured by holding them at a temperature of 80 to 85 F. for a week or 10 days after harvesting. After this they should be stored in a place where the temperature remains in the neighborhood of 55 F. Such a location is usually near the furnace in a cellar, or near the furnace chimney on the second floor of the house. There is little merit in wrapping them in paper or burying them in sand. Sweet potatoes are stored in outdoor pits or banks, but this method is not to be recommended except where no other facilities are available. Sweet potatoes stored in pits are not as good in quality as those stored in houses. For further information on storing sweet potatoes write for Farmers' Bulletin 548.

Onions.

Onions should be well matured before harvesting, and should be allowed to become thoroughly dry before being stored. They may be put up in baskets, crates, or bags, and placed in a cool dry place. The attic is better than the unheated cellar for storing onions. Temperatures slightly below the freezing point do not injure them, provided they are not moved or handled while frozen. The commercial storage of onions is briefly discussed in Farmers' Bulletin 354.

Beans, Peas, and Other Dried Products.

Such vegetables as may be kept in the dry state should be grown to as great an extent as possible. Various kinds of beans, including Lima beans, should be allowed to dry on the vines. Lima beans should be gathered as

they mature, and placed in a warm, dry place until dry enough to shell. Navy beans and kidney beans are usually harvested when a maximum of pods open and the vines cured like hay, after which they are threshed or shelled. Peas are handled in the same way as navy beans. After the beans and peas are threshed or shelled they should be placed in bags and hung in some dry place, such as a closet or attic.

Dried corn, dried apples, peaches, apricots, raspberries, etc., may be stored in the same manner. All dried products should be protected against insects, rodents and dirt.

A Pound of Honey.

When you eat a spoonful of honey you have very little idea as to the amount of work and travel necessary to produce it. To make a pound of clover honey, bees must take the nectar from sixty-two thousand clover blossoms; and to do this requires two million seven hundred and fifty thousand visits to the blossoms by the bees.

In other words, in order to collect enough nectar to make one pound of honey, a bee must go from hive to flower and back again two million seven hundred and fifty thousand times. Then, when you think how far these bees sometimes fly in search of these clover fields, often one or two miles distant from the hive, you will begin to get a small idea of the number of miles one of the industrious little creatures must travel in order that you may have a pound of honey.

Can Surplus Food But Use Jars and Cans Wisely.

Don't have an empty preserving jar in your home next fall. Reserve regular tight-sealing containers for canning foods.

Concentrate products so that each jar or can will hold as much food and as little water as possible.

Put up jams, jellies and preserves in wide-necked glasses sealed with cork or paper and paraffin. Pack fruit juices in ordinary bottles.

Don't can anything that can be kept just as well dried or in other forms. Dry navy and mature Lima beans for winter use.

Produce in your garden lots of cabbage, potatoes, and root crops that can be kept for winter without canning.—U. S. Department of Agriculture.

One need not fear to caution or reprimand cruel drivers—a cruel driver is too COWARDLY to do a human being personal injury.

Remember that WATER is the first great need of animals, especially in hot weather.

HOOVER'S PLANS FOR FOOD CONTROL

FIRST LOOK-IN ON EXPERT'S ORGANIZATION FOR CONSERVING SUPPLIES.

Washington, July 29.—A hint of the efficiency methods that will be introduced into the handling of foodstuffs by Herbert Hoover's food organization, when Congress finally gets thru mulling over the food control bill and gives Hoover some authority to act, is shown in plans already worked out for taking care of the great potato crop.

Next to cereals, potatoes will be America's biggest crop. And next to wheat, potatoes are most needed for export to our allies and to our own soldiers in France.

Last spring everybody was abjured to plant potatoes, potatoes, potatoes! Back yards and front yards and vacant lots all over the country were turned into potato patches. The result is unless other than normal methods of handling the crop are provided a very large part of it will go to waste, altho every potato is needed.

Already in the big early potato sections of Virginia and Eastern Maryland thousands of bushels are being left to rot in the ground because local markets are glutted and transportation can not be secured to outside markets.

Had the food bill been passed by July 1, this enormous waste could have been avoided. Hoover expects to be able to check it within a very short time after it is enacted.

As soon as the bill becomes a law, the food administration will provide storage facilities in every center of potato production and will buy at good price any surplus growers may not be able to place immediately on the market, or for which they can not get transportation.

From these stocks the Government will be able to equalize supply in all big cities, removing any excuse for inflated prices due to local manipulation or shortage. In cases where a particular market is glutted, with consequent danger of loss to grower or of wastage, the Government will take up the surplus and thereby stabilize both supply and price.

Immediately on passage of the law steps will be taken to equip a number of large dehydrating or evaporating plants for potatoes. Excess stocks of potatoes will be put thru these plants as rapidly as possible, relieving the demand on storage space and providing a potato product for export which will save millions of tons of shipping.

Potatoes contain eighty-five per cent water. With this water taken out, the potato requires less shipping space, weighs less and will keep indefinitely better.

Out of each 1,000 tons of potatoes for export to France we will first remove 850 tons of water. Only 150 tons of vessel space will be required instead of 1,000 tons, and the 850 tons of water can be put back in again when the potatoes are prepared for eating in France.

These dehydrated potatoes lose none of their nutritious or edible qualities in the process.

Sweet potatoes, of which the South promises a great harvest, will be handled in the same way. Many other vegetable crops may be preserved similarly.

All that is lacking to start the wheels of Hoover's big food regulating machine is a final vote by Congress. Till that comes high prices and waste will continue.

STANDARD OIL CO. HEAD FOUND SHOT TO DEATH

Oakland, Cal., July 30.—D. G. Scofield, president and director of the California Standard Oil Company, was found dead to-day with a bullet wound in his temple and a revolver by his side. He had been ill some time.

Children Cry FOR FLETCHER'S CASTORIA

Rather Plainly Put.
"What is your definition, Miss Mabel, of a manly man?" he asked.
Miss Mabel looked at him coldly. The clock struck 11. She hid a yawn behind her hand, and said:
"My definition of a manly man, Mr. Skinner, is a chap who doesn't stay on and on just because he knows the girl isn't strong enough to throw him out."

MOTHER STOLE TO AID BABIES; FINED 1 CENT

New York, July 30.—The lowest fine in the history of the Brooklyn Federal Court was imposed by Judge Chatfield in the case of Mrs. Purcell, on trial for forging a pension voucher that had come to her home in the

name of her mother after her parent had died.

She took the money, she told the Judge, for her babies, for they had no food. When the fine of one cent was imposed she was unable to pay it. Attaches of the court not only handed over the cent necessary to keep her from jail but made up a good sized purse for her.

HUSBAND SWALLOWS HER SILVER SPOONS

Philadelphia, Pa., July 29.—For several weeks Mrs. Joseph Quinlan had been mystified by the disappearance of numerous articles from her household. She changed servants half a dozen times, but the articles, such as silver spoons and pieces of household hardware, continued to be missed. Recently her husband became ill and was sent to the Philadelphia Hospital where they removed the following articles:

Thirty-four silver teaspoons.
One alcohol cigar lighter and chain.
One padlock.
Twelve screen door hooks.
One glass medicine dropper.
Six 10-penny nails.
Thirty-six carpet tacks.
Thirteen metal buttons.
Six safety pins.
Forty pieces printers' type.
Thirty-two coins.
Four souvenir medals.
Nineteen screws (assorted sizes).
Two hundred and forty-seven pebbles.

Disordered nerves were responsible. Mr. Quinlan confessed he was unable to overcome his appetite when tempted, for instance, by a nice nickel-plated screen door hook.

Lost In The Flood.

Onyx—My wife burst into a flood of tears the other night.
Bronx—Did she cause any trouble?
Onyx—I should say so. Swept away \$48 for a new hat the first torrent.—Chaparral.

He Knew Her.
Mrs. Gabbie—I met Mr. Brown today while I was shopping.
Her Husband—That so? What did you have to say?—Boston Transcript.

The Disturbing Agent.
"My poor man have you ever been pinched by poverty?"
"No, mum; not as often as I have been by the cops."

"Well, my good man, you certainly seem to be out of luck?"
"Yes, and money."

Health About Gone

Many thousands of women suffering from womanly trouble, have been benefited by the use of Cardui, the woman's tonic, according to letters we receive, similar to this one from Mrs. Z. V. Spell, of Hayne, N. C. "I could not stand on my feet, and just suffered terribly," she says. "As my suffering was so great, and he had tried other remedies, Dr. had us get Cardui. . . I began improving, and it cured me. I know, and my doctor knows, what Cardui did for me, for my nerves and health were about gone."

TAKE

CARDUI

The Woman's Tonic

She writes further: "I am in splendid health . . . I can do my work. I feel I owe it to Cardui, for I was in dreadful condition." If you are nervous, run-down and weak, or suffer from headache, backache, etc., every month, try Cardui. Thousands of women praise this medicine for the good it has done them, and many physicians who have used Cardui successfully with their women patients, for years, endorse this medicine. Think what it means to be in splendid health, like Mrs. Spell. Give Cardui a trial.

All Druggists

HOTEL POWHATAN WASHINGTON D.C.
HOTEL OF AMERICAN IDEALS
In a city where good hotels abound, the Powhatan heads the list.
It is first in the hearts of its countrymen.
The Powhatan is refined, exclusive, and restful. Its excellent location on Pennsylvania Avenue, 18th and H Streets, makes it a desirable headquarters for business, pleasure, and social life. The Powhatan attracts the people of culture and education. Its proximity to State, War and Navy Departments, also to many points of historical interest, makes this hotel especially attractive to a discriminating public.
The Powhatan offers rooms with detached bath at \$1.50, \$2.00 and up. Rooms with private bath, \$2.50, \$3.00 and up. Write for booklet with map.

MORE U. S. TROOPS LAND IN FRANCE

GREAT ENTHUSIASM SHOWN BY AMERICANS UPON THEIR DISEMBARKATION.

A European Port, July 29.—Another American contingent has safely arrived and disembarked.

The American troops arrived by the same steamer whereon Kermit Roosevelt, his wife and child traveled. When tenders went alongside the vessel Friday the men were in high spirits and frequently shouted: "Are we downhearted?" Which was answered with a roaring "no" given with great enthusiasm.

Representatives of the General Staff watched the disembarkation. There was no civic demonstration. Only a few spectators knew of the landing. These cheered and the troops cheered back. The men entrained quickly and left for their new quarters. A signal company remained at the port for some hours and these were the only representatives of the contingent which the public saw.

Flesh Colored.

A fat old colored woman entered the drug store and looked around uncertainly.

"Has you all got any paper an' envelopes with flesh-colored borders?" "Was it mourning-paper you wished?" inquired the clerk.

"You's struck it, disactly! But I desremembered the name. Glib me a box of it, if you please, sah."

Farmers Attention.

Since the inauguration of the "Good Roads" movement in Kentucky and the construction of many miles of the best roads in America, this State has been quite a haven for tourists, coming from almost every state in the Union, and since many of our farmers have failed to reog-

nize and grasp the benefits derived through the medium of publicity—in placing their names on gates and entrances to their farms—I am calling upon the land-owners in every county in this Commonwealth to please have a board or sign painted, giving the name of the owner of each farm, also the name of the farm, if same bears such, and post in a conspicuous place, on the gate or post at the entrance to the farm. This will require but little effort and expense upon the part of each landowner and the benefits derived through such simple and inexpensive methods of publicity can not be overestimated.

TRAPPED BY FOREST FIRE, FIFTY KILLED

Nelson, B. C., July 31.—Fifty men are reported today to have been trapped in a disastrous forest fire which swept over the Elk Lumber Company's plant at Spruce Creek, twelve miles east of here. Last report said that four bodies had been recovered and that the fire was still burning fiercely last night. No estimate could be made of the timber loss.

To Raise Coal Sunk In 1883.

Stockholm, July 28.—Impelled by the present high price of coal, a wrecking company has started work in an effort to recover a cargo of 1,200 tons of coal that has lain at the bottom of the Great Belt, a mile north of Nyborg, for thirty-four years. The cargo was that of the steamer Dorka, which sank in 1883. It is believed that nearly a thousand tons can be recovered. Samples recovered show the coal to be undamaged by its long immersion.

Wagons! Wagons! Wagons!

Before you buy you should examine our hand made farm wagons. They run lighter, are made of the very best material and last far longer than any machine made wagon you can buy no matter what price you pay.

We also do all kinds of Blacksmithing and Repairing, especially the hard jobs the other fellow can't do.

We also make a specialty of Horseshoeing and earnestly solicit your patronage in this line.

Respectfully yours,

A. B. Row & Son

Centertown, Ky.

WAR COST SO FAR \$80,000,000,000

FAST SUM EXPENDED TO DATE
ON MILITARY OPERATIONS
BL BELLIGERENTS.

New York, July 30.—Eighty billion dollars is the direct money cost to the belligerent governments of three years of the great war.

The cost is now amounting at the rate of \$120,000,000 a day—and this rate itself is constantly rising.

These statistics are based on what is known here of government finance in the warring nations at the present time and are close approximations of actual government expenditures from August 1, 1914, to August 1, 1917.

But they do not adequately sum up even the money expense of the struggle, still less the human loss and suffering. The total loss will never be known; it is beyond the ken of statisticians.

Neutrals' Expense Heavy.

Every neutral government in the world has had to face extraordinary expenses indirectly resulting out of the war and many of these nations have borrowed millions from other nations. Added to the bill is also hundreds of millions spent by the Red Cross and scores of other war charities. Then there is the vast destruction of property—cities, towns and villages, factories, homes, railroads, bridges and even the soil itself, lying harried and desolate under storms of shells.

Millions of productive men have been killed or wounded or crippled until they are financial burdens on the community. Human efficiency has been weakened by the general interruption of higher education over three years. The stock of trained brains has been lessened. Instead of education, insanity stalks thru the battling myriads and marks down hundreds of thousands of its gibbering victims.

Exceeds All Records.

The total cost of the twenty greatest wars in the 125 years preceding 1914 was only \$22,000,000,000.

With the money it is now spending on killing and maiming the world could build every day eight Woolworth Buildings at \$15,000,000 each.

If the \$80,000,000,000 war cost to date were divided up among the 1,632,000,000 total population of the world, every man, woman and child from Greenland to Tasmania would have to pay about \$50.

Catarrhal Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure catarrhal deafness, and that is by a constitutional remedy. Catarrhal Deafness is caused by an inflammation of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing will be destroyed forever. Many cases of deafness are caused by catarrh, which is an inflamed condition of the mucous surfaces. Hall's Catarrh Medicine acts thru the blood on the mucous surfaces of the system.

We will give One Hundred Dollars for any case of Catarrhal Deafness that cannot be cured by Hall's Catarrh Medicine. Circulars free. All Druggists, 75c.
F. J. CHENEY & CO., Toledo, O.

They Miss the Editor.

The editor of the Prison Mirror, published in the penitentiary of Minnesota, says:

Why is it that from the first inception of our paper up to the present time we have never had an editor to sojourn in our midst? Other professions have been well represented. Of preachers we have had enough to furnish subsistence to an African chief for a year; of doctors, sufficient in number to depopulate a State; of lawyers, enough to establish a good size colony in Hades. But of editors—not one.

Importance of An Ancient Tooth.

In the early days of paleontology it was said that Cuvier, the great French naturalist, could reconstruct an extinct animal from the study of a single fossil bone, and in a broad sense this was true, though the actual skeleton when found may have differed in detail from the theoretical restoration. To the geologist the bone of a fossil animal may also indicate an important episode in the history of a region and suggest the geologic age of the rocks found there.

A good example of the interesting results that may follow the finding of a fossil tooth is given in Professional Paper 108—D of the United States Geological Survey, Department of the

Interior, entitled "Wasatch fossils in so-called Fort Union beds of the Powder River basin, Wyoming," by Carroll Wegmann. Most of the broad area in northern Wyoming that lies between the Black Hills, the Bighorn Mountains, and the Laramie Mountains is underlain by Tertiary rocks, which contain the principal coal beds of the region and have usually been assigned to the Fort Union formation. The highest of these rocks are exposed near the center of the basin in Pumpkin Buttes, where Coryphodon teeth were recently found in the upper 1,000 feet of beds that had previously been called Fort Union. But Coryphodon is a large mammal that is found only in the Wasatch formation, a later division of the Tertiary system. On the evidence of the teeth, therefore, the conclusion is reached that at least 1,000 feet of rocks in the Powder River basin are of Wasatch age, and other evidence indicates that an additional thickness of 1,400 feet of underlying beds may also be of Wasatch age. A brief discussion of all the rocks above the marine Cretaceous is given in the paper, which may be obtained on application to the Director, U. S. Geological Survey, Washington, D. C.

TAXPAYERS NOTICE.

Tax bills for State and County Levy for the year 1917 have been certified to me for collection, by the proper authorities. Please call and get your receipt at the first opportunity. The earlier you settle the better it will be for all concerned. The State and County are in urgent need of finances to stop interest payments. Yours very truly,

S. O. KEOWN,
Sheriff of Ohio County.

Showing Him Up.

"The farmer gets two cents a quart the public pays twelve cents a quart—well, that is sheer robbery."

The speaker was Dr. L. C. Cattle, one of the investigators of the New York milk situation.

"These middlemen," he continued, "have been as plainly shown up as the trolley conductor."

"A man, you know, handed a trolley conductor a nickel, but the conductor did not ring up the fare."

"Five or six minutes later the man extended another nickel to the conductor."

"I got your nickel, sir," said the conductor.

"Yes, I know you did," said the man—and now here's one for the company."—Baltimore Sun.

Stomach and Liver Troubles.

No end of misery and actual suffering is caused by disorders of the stomach and liver, and may be avoided by the use of Chamberlain's Tablets. Give them a trial. They only cost a quarter.

NOTICE.

We again call the attention of our readers to the fact that The Republican will publish no communications unless signed by the author. Few weeks pass that anonymous articles are not received and it is not our desire to hurl news items into the waste basket. This anonymous communication rule is stated each week at the head of the editorial column and must be adhered to. Requests that names be omitted from print are complied with, but the manuscript must bear the writers' signature.

THE EDITOR.

No pig is happy, however fat he may be, until he has crowded some other pig out.
